DETAILED ACTION

1. This office action is in response to the application filed 27 June 2003, in which claims 1-30 were presented for examination.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Omum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-10, 14, 17-23, 29, and 30 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10, 14, 15-21, 22, and 23 respectively of U.S. Patent No. 6,421,608. Although the conflicting claims are not identical, they are not patentably distinct from each other because the position reporting device, method and computer program product claimed in the application is not patentably distinct from the position reporting device, method and computer program product claimed in the patent. The position reporting device of the patent is for attachment to any mobile object, it would have been obvious to attach

the patented device to a mobile business office device to increase maintenance efficiency and user satisfaction.

4. Claims 11-13, 15, 16, and 24-28 are further rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of the above patent. Although the conflicting claims are not identical, they are not patentably distinct from each other because as previously discussed it would have been obvious to attach the position reporting device to any mobile object which includes mobile business office devices, specifically image, image processing, and image forming devices which include photocopiers and facsimile machines.
